PROJECT

● ACADEMEIC PROJECT

AS IT STUDENT

Currently I am working on job portal web application project with my team for our collage using React technology

● E-COMMERCE (Shopping Website)

TECH STACK REACT REDUX AXIOS HTML CSS BOOTSTRAP

In this project user can select their category .basically we have four category kids, men, women and accessories. they easily add product in their cart and remove it.
I have used redux for the state management and putting lots of functionality.
also doing API fetching with the help of axios.
